General Comment: I am adamantly opposed to this proposed rule in its entirety. This is only the latest, and certainly one of the most egregious proposals, to violate the privacy and civil liberties of the citizens of this nation. We do not need the govt. collecting information on our travel and our travel companions. While I doubt the efficacy of this proposal in promoting and protecting the public health, I have not the least doubt at its corrosive effects on our Constitutional liberties. This is a thinly veiled attempt to gather the information that the govt. has been trying to get for several years (the DARPA data mining projects, CAPPS II etc.) under the guise of public health thus circumventing what limited individual protections remain to us citizens under criminal statutes since the Patriot Act.

No way! You must be out of your minds if you think we will tolerate this intrusive, persistent, govt. surveillance under whatever guise it is advanced.

The individuals that have proposed and developed this concept, and their supervisors and legal counsels who reviewed, approved, and forwarded it should be fired!
